***RE: PACKAGING IMPROVEMENTS ON USA MADE TAPS***

To our Valued Drillco Distributor,

We are excited to announce that Drillco is improving our product packaging and labeling on all of our **Made in the USA** taps. Currently, the majority of these items have a package quantity of 12, 6, or 3 pieces.

Effective immediately, all USA made taps will be available individually in a package of 1. This will allow you to purchase in singles, rather than having to order larger package quantities. Package quantities on our line of imported taps remain unchanged.

Our USA Taps will be packaged in a clear snap-pack, commonly referred to as a “kit-kat” package. This user-friendly packaging is extremely efficient; detachable units avoid time consuming packing of single items. Plastic tubes are more durable, easier to stack, easier to handle, and the contents can be viewed more easily when compared to paper envelopes.

We are confident that these improvements will be beneficial for you and your customers.

Should you have any questions, please do not hesitate to contact our customer service team at 800-851-3821, or by email at [sales@drillco-inc.com](mailto:sales@drillco-inc.com)

Best Regards,

Drillco Cutting Tools
